Summary

Computer Science student specializing in Software Engineering with a focus on JavaScript. I have experience building small full-stack applications, working with JavaScript, React, Node.js, . I am seeking an internship where I can deepen my technical skills, learn best engineering practices, and grow into a strong junior developer within a team environment.

Professional Skills

Work experience

Personal
Academic Projects,
01/2024 - present

Software Engineering Student
Developed several educational and personal projects using JavaScript, React, and Node.js.

Built a browser-based Battleship game using pure JavaScript, HTML, and CSS, focusing on game logic, DOM manipulation, and modular code structure. Used Webpack for project bundling and asset management.
